

Sound Sentinel Coding Standards

Commenting:

- Use single line comments when possible.
- For multiline comments use a second // comment avoid /* */ block comments.
- Comment a short summary before each function.
- If a class has more than one function put a brief summary at the top of the file.

Naming:

- Class and function names in pascal case.

Ex.

```
void PlzzaFunction()
{
}
```

- Use camel case for variable names.

Ex.

```
string numberOfPizzas;
```

- Avoid abbreviations whenever possible.
- Avoid excessively long names.

Layout:

- One statement per line.
- One declaration per line.
- Put at least one space between functions.
- Indent four spaces after every { (default tab in visual studio).
- {} should be vertically aligned

Ex.

```
void Pizza()
{
    //pizza stuff
}
```
